

# E-COLL

## PU-Reiniger E-COLL

### Description:

- With the included spray heat, other polyurethane foam deposits can be removed as well. This product has been manufactured under the controls established by a Bureau Veritas Certification approved management system that conforms to ISO 9001.

### Product features:

- Dual Cleaner reliably removes and loosens fresh polyurethane foam. With the standard black threaded adapter, the can will work with all current foam guns. Using propelled gas pressure, makes it easy clean and rinse inside the gun. The active ingredients are safe to use with PU gun parts. Regular use will significantly prolong the foam guns useful life and operational efficiency.

### Product benefits:

- High cleaning efficiency
- Ideal for fresh foam
- Can be used for the foam guns

### Cleaning the foam gun:

- Before starting, have a waist can (e.g. a cardboard box) and cloth ready in order to catch surplus foam and cleaning fluid. After removing the emptied PU foam can, first spray the guns threaded housing with Cleaner. Attach the red spray head. All other fresh PU foam residue on the foam gun can be loosened and removed by spraying the affected area. To clean the inside of the foam gun, screw the black adapter onto the threaded housing of the gun. Press the trigger several times until clear cleaning fluid comes out – holding the tip over an appropriate catch basin. Leave the cleaner inside the gun for about 2 minutes.

### Contents:

- 500ml Spray

### Zur Beachtung:
