Ⓓ HANDHABUNG SICHERHEITMESSER

Ein stabiles, ergonomisch geformtes Schneidwerkzeug aus Aluminium. Die Klinge verschwindet in Sekundenbruchteilen im Griff, sobald sie keinen Kontakt mehr zum Schneidmaterial hat – selbst wenn Sie den Schieber festhalten. Damit der vollautomatische Klängenrückzug nicht beeinträchtigt wird, befreien Sie das Produkt bitte regelmäßig von Materialresten!

Klingenwechsel: Wippe nach unten drücken (Abb. 1), Messer drehen und den Schieber in die vorderste Position bringen. Für Rechts- und Linkshänder gilt: Achten Sie darauf, dass die transparente Klängenabdeckung immer oben ist (Abb. 2a+2b)! Wenn sich die Klängenabdeckung öffnet, Klinge wenden oder wechseln, Schieber loslassen und Wippe wieder verriegeln (Abb. 3). Prüfen Sie mit dem Schieber, ob der Klängenrückzug wieder einwandfrei funktioniert.

Achtung, Verletzungsgefahr! 1. Messer niemals im Bereich des Klängen Schlitzes festhalten (Abb. 4)! 2. Klinge nur am Klängenrückzug anfassend – niemals an der Schneide (Abb. 5)! 3. Niemals schneiden, wenn die Wippe nicht verriegelt ist (Abb. 3)!

Ⓔ SAFETY KNIFE HANDLING

The ergonomically styled heavy-duty knife body is made of aluminium. The blade retracts instantly into the handle the moment blade edge contact is lost – even if and when the user holds on to the slider. To keep the fully automatic safety function active, it is important to ensure that the knife is clean and free from any material residue at any and all times!

Blade change: Push the lock rocker down (fig. 1), turn knife over and move the slider forward. For attention of all right- and left-handers: Please make sure that the transparent blade cover plate is always facing up (fig. 2a+2b)! When the blade retaining plate opens up, reverse or change the blade, let go of the slider and activate the lock rocker (fig. 3). Work the slider to check that the blade retraction is working smoothly again.

Caution – Risk of cutting accidents! 1. Never hold the knife at the blade outlet (fig. 4)! 2. Always hold the blade at its back – never at its edge (fig. 5)! 3. Never use when lock rocker is not activated (fig. 3)!

Ⓕ UTILISATION COUPEAU DE SÉCURITÉ

Un outil coupant robuste en aluminium de forme ergonomique. Un ressort rétracte en quelques fractions de seconde la lame dans la manche dès qu'elle n'est plus en contact avec le produit coupé – même si l'utilisateur maintient le curseur. Afin de garantir le bon fonctionnement de la protection de la lame, il est nécessaire d'ôter régulièrement les restes de matières éventuellement déposées à l'intérieur du couteau.

Changement de lame : appuyer sur la bascule (repr. 1), retourner la couteaux et déplacer le curseur sur sa position la plus avancée. Valable pour les droitiers et les gauchers: veiller à ce que la plaquette transparente du porte-lame se trouve toujours au-dessus (repr. 2a+2b)! Le support de lame s'ouvre, retourner ou changer la lame, lâcher le curseur et verrouiller la bascule (repr. 3). Actionner le curseur afin de vérifier le bon fonctionnement du dispositif de rétraction.

Attention, risque de blessure ! 1. Ne jamais tenir le couteau du côté de la sortie de la lame (repr. 4)! 2. Ne saisir la lame que par l'arête non affûtée – jamais par le tranchant (repr. 5)! 3. Ne jamais couper si la bascule n'est pas verrouillée (repr. 3)!

Ⓖ MANEJO CUCHILLO DE SEGURIDAD

El cutter ergonómicamente diseñado, tiene mango de aluminio y puede cortar prácticamente cualquier tipo de material. El cutter también presenta la tecnología de SEGURIDAD MARTOR muy comprobada en la que la hoja se retrae completamente automática, instantáneamente cuando pierde contacto con el material a cortar – aún cuando el usuario mantenga el dedo sobre el desplazador de la hoja. Para mantener el mecanismo de seguridad automático siempre activo, es importante asegurarse de que el cutter esté limpio y libre de residuos en todo momento!

Cambio de hoja: Presione el balancín hacia abajo (fig. 1), gire el cuchillo y mueva el desplazador hacia adelante. ATENCIÓN! Tanto diestros como zurdos deben asegurarse de que la cubierta transparente de la hoja esté siempre mirando hacia arriba (fig. 2a+2b). La placa que sostiene la hoja se abre, gire o cambie la hoja, suelte el desplazador y coloque en su posición el balancín (fig. 3). Accione el desplazador para verificar que el mecanismo auto-retráctil funciona suavemente.

¡PRECAUCIÓN – Riesgo de accidentes por corte! 1. Nunca sostenga el cutter a la salida de la hoja (fig. 4)! 2. Siempre sujete la hoja por la parte superior – NUNCA por el filo (fig. 5)! 3. Nunca usar mientras el balancín no esté activado (fig. 3)!

Ⓗ GEBRUIK VEILIGHEIDSMES

Een zeer stabiele meshouder van aluminium in een ergonomisch design. Het mesje verdwijnt automatisch in de meshouder zodra er geen contact meer is met het te snijden materiaal. Zelfs wanneer men de duim op de schuif houdt. Om de werking van het automatische veermechanisme te waarborgen is het nodig het mes regelmatig schoon te maken.

Mesje verwisselen: knop naar beneden drukken (afb. 1), mes omdraaien de schuif in de voorste positie brengen.
