Lubricants for trades and industry

opta Akawax High-Performance Cutting Grease

General Description

opta Akawax is a high-performance cutting grease based on mineral oil with highly active additives for metal cutting.

opta Akawax is free of chlorine, silicone, PCB and solvents.

Area of Application

- For the machining of stainless steels and general steel grades. Non-ferrous metals can discolour in contact with **opta Akawax**.
- **opta Akawax** is indispensable where it is not possible to lubricate with liquid oils, especially when cutting threads above the head and when sawing. With **opta Akawax** there are no spills or drops.
- **opta Akawax** is preferably used for the lubrication and cooling of metal saw blades and for threading.
- Excellent results are also achieved in surface grinding with abrasive belts.

Advantages

opta Akawax is economical and convenient to use. Optimum cutting performance, surface quality and tool protection are achieved through excellent cooling and lubrication. In addition to optimum dimensional accuracy, longer tool life and outstanding surface qualities are achieved with less waste.

Shipping units:

20x80g
10x350g
